ABSTRACT

One of six volumes summarizing through narrative and statistical tables data collected by the Equal Employment Opportunity Commission in its 1974 survey, this sixth volume details the employment status of minorities and women in special district governments (excluding school districts), by examining the general governmental activities they performed, the kinds of jobs they held, and the wages they were paid. Special districts are defined as independent local governments (e.g., authorities, commissions, administrations, etc.) created to provide specific community services, such as mass transit systems, sanitation and sewage, energy and soil conservation, health care, and housing. The conclusion was made that minorities and women were both well represented in special district employment. However, women were virtually dependent on hospitals and sanatoriums for employment, while minorities, especially men, were over-concentrated in service/maintenance jobs. Women were virtually excluded from the high salary utilities or transportation district jobs and minorities were substantially underrepresented in the professional and decision-making positions in all functions. Appendixes, which make up the greater part of this document, contain statistical summaries of special district information, instructions for filing and report form, and source and reliability of data. FOREWORD

State and local public service agencies offer numerous jobs of varied nature, especially in times of rising unemployment in the private sector. Employment in State and local governments expanded, and employment of minorities and women increased slightly since the Commission's initial survey in 1973. However, equal employment opportunity has not yet been fulfilled in State and local government. The 1974 data reveal that minorities and women continue to be concentrated in relatively low-paying jobs, and even when employed in similar positions, they generally earn lower salaries than whites and men, respectively.

Through the EEO-4 survey, the Commission can observe and report on the activities of these public employers to help ensure that minorities and women are accorded their fair share of public employment.

Ethel Bent Walsh
Vice Chairman
Equal Employment
 Opportunity Commission

ACKNOWLEDGEMENTS

Minorities and Women in State and Local Governments is a product of the Research Division. This report was prepared by Winston Robertson, Social Science Research Specialist, under the general supervision of Frank A. Haughton, Acting Chief, Research Branch, and the direct guidance of Harriett J. Harper, Supervisory Economist. Chung-Kuang Cheng validated the statistics, Joan Hannan edited the report, and Alicia E. Smith typed the report for publication.

Appendix 1: Statistical Summary

Appendix 2: State and Local Government Information (EEO-4), Instructions for Filing and Report Form

Appendix 3: Source and Reliability of Data

TECHNICAL NOTE

The data used in this report are based on the 1974 State and Local Government Information Report, EEO-4 (See Appendix 2 for reporting instructions and a copy of the form). All States, all other political jurisdictions with 100 or more employees and an annual sample of jurisdictions with 15-99 employees are included in the EEO-4 reporting system. Data from the sampled jurisdictions are appropriately weighted to account for non-sampled jurisdictions.

Data do not include certain elected or appointed officials, nor employees of public elementary and secondary school systems or higher education institutions, who are excluded from the scope of the EEO-4 reporting system. A detailed description of the survey method and reliability of data are contained in Appendix 3.

INTRODUCTION

The Equal Employment Opportunity Commission (EEOC) administers Title VII of the Civil Rights Act of 1964 (as amended by the Equal Employment Opportunity Act of 1972), which prohibits employment discrimination on the basis of race, color, religion, sex, and national origin. In accordance with Section 709(c) of the Act, since 1973 State and local governments have been required to file reports with EEOC concerning the race/ethnic and sex characteristics of their work forces.

Minorities and Women in State and Local Government-1974, is a six volume series consisting of a United States Summary and separate summaries on the five types of governments (State, county, municipal, township and special district).

This sixth volume details the employment status of minorities and women in special district government (excluding school districts), by examining the general governmental activities they performed, the kinds of jobs they held and the wages they were paid.

GENERAL CHARACTERISTICS

Special districts are independent local governments created to provide specific community services . They became prominent in the twentieth century, particularly after 1930. Despite continued growth, special districts lack the exposure given to other local governments. Consequently, many people believe that some types of districts (i.e. transit authorities or sanitary commissions) are actually parts of other local governments.

Special districts qualify as local governments because they are authorized by State law, and are given sufficient administrative and fiscal autonomy. They differ from other local governments in numerous ways. Special districts are usually established to perform a single function, although some multiple-function districts are authorized. Revenue is obtained chiefly from service charges, rather than from the chief revenue source for most local governments, tax receipts. Appointments are more widely used to select governing officials than the election process widely used in other local governments. In most instances, special districts are authorized to overlap the geographical area occupied by other districts (their functions must be different) or of other local governments.

Special districts are playing an increasingly important role in the local governmental system. They are the most numerous of local governments, with an estimated 24,000 units nationwide. They provide services as diverse as mass transit systems, sanitation and sewerage, energy and soil conservation, health care, and housing, to name a few. Despite the large operations of some special districts, less than 6 percent of the 24,000 units employed 20 or more employees.

Reflecting the small-scale operations of most special districts, less than 3 percent filed reports with EEOC in 1974. For those that filed, total employment was 276,000. This total represented an estimated 74 percent of all special district employees 1/ but comprised less than 6 percent of the aggregate State and local government work force in 1974.

Special districts surveyed by EEOC employed 84 percent of their work forces full-time, and 16 percent in other than full-time jobs. Nearly half (46 percent) of the employees were women and more than a fourth (27 percent) were minorities. Both exceeded their proportions in the U.S. civilian labor force, women by 6 percentage points and minorities by an estimated 12 percentage points. Blacks comprised four-fifths of the minorities employed in special districts. They were 21 percent of all employees, well above the 10 percent incidence of blacks in the civilian labor force. However, Asian Americans at 0.8 percent and American Indians at 0.2 percent were both underrepresented among special district employees in relation to their incidences in the labor force.

1/ EEOC's coverage of total employment in special districts was 74 percent of the 373,843 employees reported by the Bureau of the Census as of October 1974. Labor-Management Relations in State and Local Governments: 1974, U.S. Department of Commerce.

Table 1. Participation Rates of Special District Employees by Type of Employment, Race/Ethnic Group and Sex, 1974

Employee Group	Total Employment	Full-Time Employment	Part-Time Employment
All employees	275,920	232,454	43,466
White	73.3	71.7	82.2
Minority	26.7	28.3	17.8
Black	21.2	22.6	13.5

FULL-TIME EMPLOYMENT

Most special districts surveyed by EEOC were created to provide health, transportation or utility services. Consequently, nearly three-fourths of all full-time employees worked in the hospitals and sanatoriums or utilities and transportation functions. If employment in housing, sanitation and sewage and natural resources/parks and recreation are added, these five functions accounted for 94 percent of all full-time employees in special districts.

Table 2. Functional Distribution of Full-Time Employment in Special District Government, 1974

Function	Median Annual Salary	Number	Percent
Total	$ 9,261	232,454	100.0

Service/maintenance	9,500	66,396	28.6

Source: "State and Local Government Information" (EEO-4) reports, EEOC, 1974.

Service/maintenance workers comprised the largest group of full-time special district employees (29 percent). In most types of government, the service/maintenance category implied employment in low-pay and low-skill jobs, because salaries paid to these workers were among the lowest earned by State and local government employees. However, in special districts, particularly those performing the utilties and transportation function, service/maintenance workers performed more complex tasks and carried more responsibility. As a result, 46 percent of the service/maintenance workers in special districts were paid more than $10,000 a year. Not all service/maintenance workers earned such high salaries. Hospitals and sanatoriums, which employed 24 percent of all service/maintenance personnel, paid less than 6 percent of them $10,000 a year or more.

Jobs were sparse in the protective service category because special districts usually provide protective service only in conjunction with the services they offer. Rarely do they provide protective services to the community at large like other types of State and local governments. Only 2 percent of the special districts surveyed by EEOC reported employment in either the police or fire protection functions. Administrators, the highest paid employees in special districts, also constituted one of the smaller employee groups, but their proportion in special districts (6 percent) was similar to the proportion (5.3 percent) of administrators in all State and local governments.

Clericals, 15 percent of all full-time employees, were not as large a group in special districts as in the aggregate State and local government work force (19 percent). The small-scale operations of most special districts do not need the extensive paperwork characteristic of larger and more complex organizations. The lack of employment in the financial administration/general control function, where a third of all clericals in State and local governments worked, also contributed to the lower proportion of clericals in special districts. Districts operating on a large scale, those providing health care, utility, or transportation services, employed nearly three-fourths of the office/clerical workers.

The skilled craft and professional categories each comprised 13 percent of the full-time employees. Skilled craft opportunities were most often found in the utilities and transportation function. Districts performing these services employed nearly three-fifths of the skilled craft workers and paid 80 percent of them over $10,000 a year. Professionals were employed principally in hospitals and sanatoriums (over 60 percent) and to a lesser degree in utilities and transportation (17 percent). However, salaries paid to professionals were much higher in utilities and transportation, where 84 percent earned more than $13,000, than in hospitals and sanatoriums where only 11 percent exceeded $13,000.

Employment patterns for technicians, who were 11 percent of the full-time employees, were quite similar to those of professionals. Most worked in hospitals and sanatoriums (59 percent) but a large group (25 percent) worked in utilities or transportation districts. Again, salaries earned by technicians were much higher in utilities and transportation where 92 percent earned more than $8,000, than in hospitals and sanatoriums where 24 percent exceeded that amount.

In special districts, employees working as paraprofessionals (10 percent of all employees) were almost exclusively employed by hospitals and sanatoriums (82 percent). Their median annual salary was the lowest of the eight employee groups surveyed. (See table 3.)

Full-time jobs in special districts were principally found in two functions--hospitals and sanatoriums, utilities and transportation--but salaries in the two were strikingly different. Hospitals and sanatoriums employed the overwhelming majority of professionals, technicians and paraprofessionals. Because of their concentration in this low-paying function, median salaries for these employee groups were well below their median salaries in State and local government employment overall. In contrast, the utilities and transportation function employed the greatest number of service/maintenance and skilled craft workers. Median salaries for these employee groups in special districts exceeded their median salaries in all State and local governments by an average of $2,000.

Employment of Women

Women were 44 percent of the full-time employees in special districts, but less than 17 percent received salaries above $10,000, compared to 65 percent of the men. Women's low earnings in special districts can be traced to the following: Seventy-five percent of the women worked in the low-paying hospitals and sanatoriums function, while 53 percent of the men were employed in utilities and transportation, where 78 percent of the employees earned over $10,000 a year. Almost three-fifths of the women employees in functions other than hospitals and sanatoriums were poorly paid clericals. Even when employed in like occupations, the salaries women earned were consistently lower than the salaries men earned.

It should be noted that at all levels of government women held significant employment proportions in the hospitals and sanatoriums function and small proportions in the utilities and transportation function. However, due to the dominance of these functions in special districts, the implications for women's employment are magnified. For example, a large number of the utilities and transportation workers were paid the highest salaries among special district employee groups, but only 11 percent of these workers were women. Since no other function offered nearly as many high-paying positions, women could easily reduce the gap between their salaries and men's with increased participation in utilities and transportation.

Clerical jobs were the most frequent sources of women's employment (29 percent). They accounted for the largest share of women's employment in the majority of functions in special districts. Most clericals (74 percent) were employed by either hospitals and sanatoriums or utilities and transportation; women clericals, however, were employed most often in hospitals and sanatoriums, where the overall median salary for office/clericals was $4,000 less than the corresponding median salary in utilities and transportation. In contrast, 62 percent of the male clericals were employed by utilities and transportation. Consequently, 50 percent of the men but only 10 percent of the women in clerical jobs received salaries of $10,000 or more a year.

Table 4. Occupational Distribution of Full-Time Employees in Special District Government, Sex, 1974

Job Category	Men	Women
Total: number	131,146	101,308
percent	100.0	100.0
Officials/administrators	7.9	3.4
Professionals	8.6	18.7

Office/clerical	4.0	29.2
Skilled craft	22.3	1.3
Service/maintenance	40.4	13.3

Note: Due to rounding, percentages may not add to 100.0.
Source: "State and Local Government Information (EEO-4) reports, EEOC, 1974.

Professional and para-professional jobs each accounted for 19 percent of women's total employment. Eighty-seven percent of the women para-professionals and 85 percent of the women professionals were employees in hospital and sanatorium districts. As with clericals, women professionals and to a lesser extent women para-professionals earned salaries consistently lower than salaries earned by men in such jobs. Of the professionals earning more than $13,000 in special districts (the median salary for professionals in all State and local governments was $11,200 in 1974), men comprised 79 percent. Of the para-professionals earning more than $8,000 in special districts (the median salary for para-professionals in State and local governments was $7,200), men comprised 57 percent.

Technicians were 15 percent of total female employment, with the overwhelming majority (89 percent) employed by hospitals and sanatoriums. Salaries earned by women technicians were well below salaries for men in such jobs. Two-thirds of the men and only 6 percent of the women earned salaries above $10,000. The gap resulted from women's concentration in hospitals and sanatoriums ($6,800 women's median salary) while two-thirds of the male technicians worked either in the utilities and transportation or the sanitation and sewage functions, where their median salary was approximately $12,600 in each.

In service/maintenance also, women were denied access to the top-paying functions. Of the 31,000 service/maintenance workers employed in utility or transportation districts (median salary-$11,700), less than 1,000 were women. In contrast, 86 percent of the female service/maintenance employees worked in hospital and sanatorium districts where the median salary for female service/maintenance workers was $5,300 a year. Women's exclusion from service/maintenance jobs in utilities and transportation, and their easy access to those in hospitals and sanatoriums, resulted in 90 percent of the female service/maintenance workers earning below $8,000 a year (three-fourths of the male service/maintenance workers earned more than that amount).

Skilled craft jobs were not a significant part of women's overall employment. Of the 1,345 female skilled craft workers (1.3 percent of total female employment), four-fifths were employed in hospitals and sanatoriums, where their median annual salary was a low $4,900 a year. In contrast, skilled craft workers accounted for more than a fifth (22 percent) of the male workers and half of them were paid $12,000 or more a year. Only 93 women were employed among the 17,800 skilled craft workers in the utilities and transportation function, but the few who were able to penetrate those jobs had a median annual salary ($14,100) that was more than $1,600 higher than the median salary for men ($12,450). Consequently, if women were hired into these skilled craft jobs at anywhere near their proportion in total employment, wages paid to female workers in special districts would rise significantly.

Less than 1 percent of the women employees in special districts worked in protective service jobs. Furthermore, 60 percent of the females in this classification worked in hospitals and sanatoriums where their median annual salary was $5,500. Only 16 percent were employed in either fire, transportation or utility districts (these districts employed 64 percent of all protective service workers). The average median annual salary for these districts was $12,400.

Women administrators were 3.4 percent of the women employed in special districts. Hospitals and sanatoriums employed 69 percent of the female administrators and housing districts employed 15 percent. Utilities and transportation, which employed a third of the administrators, employed women in only 4 percent of its administrative jobs. Salaries earned by most women administrators were well below those earned by most men in such jobs. While a third of the women earned more than $13,000 a year, three-fourths of the men earned comparable wages. Median salaries further indicate the large gap between earnings of men and women in these jobs. In hospitals and sanatoriums the salary gap was $3,000 and in utilities and transportation it doubled to $6,000.

Participation rates summarize women's inability to penetrate the better paying jobs in special districts. Administrative, skilled craft and protective service jobs were principally performed by men. When women were employed in these jobs

Table 5. Participation Rates of Full-Time Employees in Special District Government, by Sex, 1974

Job Category	All Employees	Men	Women
Total	232,454	56.4	43.6
Officials/administrators	13,850	75.0	25.0
Professionals	30,221	37.4	62.6
Technicians	26,499	43.5	56.5
Protective service	6,280	94.2	5.8
Para-professionals	23,798	19.2	80.8
Office/clerical	34,776	15.0	85.0
Skilled craft	30,634	95.6	4.4
Service/maintenance	66,396	79.8	20.2

Source: "State and Local Government Information" (EEO-4) reports, EEOC, 1974.

(they held only 25, 4 and 6 percent, respectively) they usually worked for salaries lower than those paid to men. Of the top paying jobs in special districts, only in the professional classifications did women hold a majority (63 percent); even here the salaries earned by women were far less than those paid to men (women's median salary was $5,100 less than men's). Women were only 20 percent of the service/maintenance workers, and they were principally employed in the lower paying jobs.

In contrast to their low employment levels in the better paying jobs, women dominated employment in the three lowest paying job categories. Women were more than four-fifths of the clericals ($7,000 median annual salary) and para-professionals ($5,400 median annual salary) and well over half the technicians ($7,900 median annual salary) in special districts. In each instance women's employment in hospitals and sanatoriums was responsible for their high employment level. In each instance the gap between salaries earned by men and women in these jobs resulted from men's easy access to and women's exclusion from the utilities and transportation function.

Table 6. Median Salary Comparisons of Full-Time Special District Employees by Occupation and Sex, 1974

Job Category	Men	Women	Difference
Total	$11,396	$ 6,715	$ 4,681
Officials/administrators	16,682	11,438	5,244
Professionals	15,066	9,994	5,072
Technicians	11,621	6,923	4,698

Employment of Minorities

The proportion of minorities (28 percent) in special districts was the highest among the five types of State and local governments. Blacks comprised the largest group, accounting for four-fifths of the minority workers. Spanish Surnamed Americans (SSA's) accounted for 16 percent of the minority workers, but three-fourths of the SSA's worked in special districts in either California or Texas. Asian Americans were sparsely represented, being only 3 percent of the minority workers and less than 1 percent of all special district employees. They, too, were concentrated in a small geographical area since half the Asians worked for special districts in California. American Indians, the smallest minority group, were 0.8 percent of the minority workers and 0.2 percent of all special district workers.

Minorities' highest participation was in the health function, where they comprised 59 percent of the employees. They were employed at their lowest level in fire protection, accounting for only 2 percent of the employees (see table 8). In hospitals and sanatoriums minorities participated at the same rate as in total full-time employment (28 percent) while in utilities and transportation the minority participation rate (24 percent) was slightly less than their full-time rate.

Forty-five percent of the minority employees in special districts were service/maintenance workers, a proportion which was more than twice the proportion (22 percent) service/maintenance workers were of total white employment. Only 9 percent of all minorities were skilled craft workers, only 7 percent were professionals and only 2.5 percent were administrators. In contrast, 15 percent of the white employees were skilled craft workers, 15 percent were professionals and, significantly, 7 percent were administrators, a rate nearly three times the proportion administrators were of total minority employment (See table 9).

Women comprised 45 percent of the minority workers in special districts. Most worked in hospitals and sanatoriums (71 percent) principally as poorly paid service/maintenance or para-professional workers. When employed in the better paying jobs in hospitals and sanatoriums, minority women usually participated at less than their total employment rate, but did earn salaries comparable to those for white women. Since women earned salaries considerably lower than men's, minority women faced the dual problem of obtaining access to the better paying jobs and earning a wage rate comparable to men. Consequently, wages paid to these employees were the lowest of all employee groups in special districts.

Outside of hospitals and sanatoriums, minority women comprised 48 percent of the health employees, but this proportion represented only 2,200 jobs. They were 15 percent of the housing employees, but less than 3 percent of the employees in either the utilities and transportation, sanitation and sewage or natural resources functions.

Employment of Blacks. Blacks were 23 percent of the full-time employees in special districts, a proportion far above their 10 percent rate in the civilian labor force. Black participation rates indicate easy access to jobs in special districts for both men and women, but salary data show black women as the lowest paid workers among the larger employee groups.

Table 12. Annual Salary Distribution of Full-Time Special District Employees, by Race and Sex, 1974

Black employment by sex shows men comprising 54 percent and women 46 percent of the total black work force. Despite this evenness in employment, 81 percent of the black women earned less than $8,000, while 71 percent of the black men earned more than that amount. As noted earlier, women in special districts consistently earned lower salaries than men. Yet white women earning less than $8,000 accounted for only 62 percent of their total work force, 19 percentage points less than the corresponding proportion of black women. Furthermore, comparing statistics for the aggregate of State and local governments with those in special districts, we find that the difference between median salaries for white and black women was less than $200 in the aggregate, but jumped to nearly $1,300 in special districts. Between white men and black women, the median salary difference was $3,200 in the aggregate, but in special districts it was $5,600. Consequently, we can conclude that discriminatory employment patterns exist in special districts that affect black women's earning power more so than other employee groups. Throughout this section we will show causes for black women's low earnings in special districts, at the same time pointing out that black men, despite their higher earnings, also suffer from discriminatory employment practices.

Black men enjoyed their highest median salary level in special district government. Their median salary ($10,200) exceeded the black median in the aggregate State and local government work force ($8,700) by $1,500. Black men earned high wages in special districts due to their high participation in the utilities and transportation function. More than 70 percent of the black men who earned over $10,000 in special districts worked in this function. Most worked as service/maintenance workers, but these employees were among the higher paid workers in special districts. (See page 112-appendix 1). Still, while 77 of every 100 black men were service/maintenance workers, only 1 of every 100 were administrators and barely 2 of every 100 were professionals. The lack of black employment in such important jobs in this function and most others in special districts implies the true status of black men, notwithstanding the wages they earned.

Black women were virtually excluded from employment in utilities and transportation. Less than 2 percent of the function's employees were black women, accounting for only 6 percent of the black women employed in special districts. Nearly 60 percent of the black women employed in utilities and transportation were clericals, the lowest paid workers in the function. In contrast only 0.2 percent were administrators and 0.7 percent professionals. In utilities and transportation the median salary for each of these job categories exceeded $17,000 a year. Nevertheless, salaries earned by those black women employed in utilities and transportation were among their highest in all special district functions. Nearly 60 percent earned wages in excess of $10,000 a year. Therefore, we can only hypothesize what their earnings might have been if they had received a fair share of employment in all of the function's job categories.

Hospitals and sanatoriums employed 39 percent of the black workers in special districts. The function's median salary ($6,400) for full-time workers was the lowest among the major functions of special districts. Still, the median salary for blacks employed in hospitals and sanatoriums

($5,500) was lower by $900. Since 7 of every 10 black women employed in special districts worked in this function, the low overall earnings of black women can be directly attributed to their employment concentration in hospitals and sanatoriums.

While accounting for 18 percent of hospital and sanatorium employees, black women were virtually excluded from administrative jobs in that function. Only 1 percent of the 4,600 administrators were black women. Their employment in professional jobs was not much better; only 6 percent were so employed. In contrast, nearly half (49 percent) of the administrators and more than three-fourths of the professionals were white women. Since median salaries for workers in these job categories were $12,400 and $10,000 respectively, any opportunity for a significant segment of the black female work force to earn high wages in this typically low-paying function was severely limited.

Black men in hospitals and sanatoriums were employed principally in two job categories; half were service/maintenance workers and more than a fourth were paraprofessionals. Both of these occupations paid relatively low salaries and 80 percent of the black male service/maintenance workers and 83 percent of the black male paraprofessionals earned less than $6,000 a year. Black men were virtually excluded from administrative and professional jobs. Less than 2 percent of the administrators and less than 1 percent of the professionals were black men. More than half (52 percent) of the white men employed in hospitals and sanatoriums earned wages above $8,000 a year. Furthermore, while holding only 13 percent of all jobs, white men filled 45 percent of the administrative jobs. Even among professionals, a category traditionally dominated by women in this function, white men held 12 percent of the jobs, almost equalling their total employment rate in the function.

Housing districts were the third largest employers among special districts, employing approximately 10 percent of all employees. Blacks accounted for half the employees in these districts, attaining participation rates in the higher paying job categories well above corresponding rates for other functions. For example, blacks were 38 percent of both the administrators and professionals in housing districts. While well above typical black participation in most functions, the black proportion of administrators and professionals was still less than black's participation in housing's total employment. The usual gap batween black and white participation in the better paying jobs was reduced immensely in this function, but blacks in these jobs continued to be employed below, while whites continued to be employed above, their respective total employment rates for the function.

Besides easy access to jobs, blacks in housing districts also earned relatively high wages, as 58 percent earned more than $8,000 a year. However, whites fared considerably better since 73 percent earned more than $8,000 a year.

The housing, utilities and transportation, and hospital and sanatorium functions employed 88 percent of the black work force in special districts. In each of these functions, the composition of black employment was quite different. In housing, blacks were half of total employment, with both black men's and women's employment higher than the employment levels of white men and women respectively. In utilities and transportation, black men predominated, accounting for 90 percent of total black employment. In hospitals and sanatoriums the reverse was true as black women filled 82 percent of all black-held jobs. However, despite blacks' varying employment proportions among these major functions, two negative factors remained. Blacks held large proportions of the lower paying, least responsible positions, while they were underutilized in administrative and professional jobs.

Employment of Spanish Surnamed Americans. Less than 5 percent of the full-time special district employees were Spanish Surnamed Americans (SSA's), and 75 percent of them worked in special districts in either California or Texas. Unlike the other employee groups, men were a much greater proportion (62 percent) of total Spanish Surnamed American employment than women (38 percent). The difference arose because of virtual exclusion of female Spanish Surnamed Americans from jobs in utilities and transportation. These districts along with hospitals and sanatoriums employed 73 percent of all Spanish Surnamed American workers. (See table 11.) Among the remaining special district functions, Spanish Surnamed Americans exhibited significant employment levels only in the housing function, which accounted for 15 percent of their employment. Salaries earned by Spanish Surnamed Americans were less than comparable to those whites earned. While 65 percent of the white employees earned $8,000 or more, only 44 percent of the Spanish Surnamed Americans earned comparable wages.

By examining Spanish Surnamed American employment in hospital and sanatorium districts and utilities or transportation districts, we can explain why Spanish Surnamed Americans earned wages considerably lower than wages paid to whites. Hospitals and sanatoriums employed 38 percent of the Spanish Surnamed Americans in special districts. More than four-fifths of these workers earned less than $8,000 a year, the result of the fact that over two-thirds of their employment was in low-paying service/maintenance, office/clerical or para-professional jobs. In contrast, less than a third (29 percent) of the Spanish Surnamed American work force, compared with nearly half (48 percent) of the white work force, were employed in administrative, professional or technical jobs, three of the highest paying positions in hospitals and sanatoriums. When employed in professional and technical jobs, median salaries for Spanish Surnamed Americans were comparable to those for whites, but the low level of participation experienced by Spanish Surnamed Americans negated the positive effects of their high median salaries.

Thirty-five percent of all Spanish Surnamed Americans worked in utility or transportation districts, but very few of these employees were women. When employed in this function four of every five Spanish Surnamed American women worked as clericals, the lowest paid workers in this high-paying function. Spanish Surnamed American men, who held 90 percent of the Spanish held jobs, worked principally as service/maintenance workers (54 percent) and to a lesser extent as skilled craft workers (24 percent). Of the functions'9,600 employees in administrative and professional jobs, fewer than 200 were Spanish Surnamed Americans. Salaries earned by Spanish Surnamed Americans reflected their virtual exclusion from the function's better paying jobs. While 78 percent of the white employees earned more than $10,000 in utilities/transportation, only 52 percent of all Spanish Surnamed Americans earned comparable wages.

The employment status of Spanish Surnamed Americans was quite similar to that for blacks. Spanish Surnamed Americans were consistently denied their share of the better paying, challenging positions while being over-represented in special district's low-paying, low-skilled jobs.

Employment of Asian Americans. Nationwide there were 1,986 Asian Americans employed in special districts, less than 1 percent of all special district employees. Furthermore, over half were employed by special districts in the State of California alone. Asian employees earned the highest salaries among employee groups in special districts. Their median salary of $11,100 a year was $1,300 more than the median salary for white workers. Nevertheless, the high wages earned by Asians had little impact on the overall earnings position of minorities, because so few were employed. Asian Americans achieved their high median salary because 45 percent of all Asians employed in special districts were professionals. (See table 9.) This characteristic of Asians' employment was not unique to special districts, but was found in all five types of State and local governments surveyed by EEOC. Most of the Asian professionals (61 percent) were women. They worked principally for hospitals and sanatoriums (93 percent), where their median annual salary was $9,800 a year. In contrast, 46 percent of the Asian male professionals worked in utility or transportation districts where their median annual salary was $18,800.

Aside from professional jobs, Asian Americans' employment was primarily in technical (14.5 percent - 288 employees) service/maintenance (13.8 percent - 274 employees) and clerical jobs (11.8 percent - 234 employees). Among functional areas, 45 percent of the Asians worked for hospitals and sanatoriums and 35 percent in utilities and transportation. No other function in special districts employed more than 6 percent of the Asian workers (see table 11).

Employment of American Indians. American Indians were virtually excluded from special district employment. The 530 who were employed represented two-tenths of one percent of all special district employees. More than half (52 percent) the work force of American Indians were employed by utilities or transportation districts. Nearly three-fourths (73 percent) of the American Indian men employed in special districts worked in utilities or transportation districts, principally as skilled craft, service/maintenance or technical employees. A third of the work force worked in hospitals and sanatoriums. About 85 percent of these employees were women, principally employed as para-professionals. The median salary ($9,300) for American Indians was comparable to that for whites ($9,800), and second only to Asians among minority groups.

New Hires

The 1974 EEO-4 survey was the first for which statistics on new hires were collected. Between July 1, 1973 and June 30, 1974, 53,731 permanent full-time employees were hired by special districts. Women accounted for more than half (57 percent) of these new hires and minorities nearly a third (31 percent). Among minorities, blacks accounted for 24.4 percent of the new hires, Spanish Surnamed Americans 5.3 percent, Asian Americans 1.1 percent and American Indians 0.3 percent.

Women continued to be hired for clerical (29 percent), para-professional (23 percent) or professional jobs (18 percent). Less than 1 percent were hired for either administrative or skilled craft positions, jobs where women historically have been denied their fair share of employment. In contrast, 3 percent of the men were hired for administrative jobs and 12 percent for skilled craft jobs, indicating a continuation of their dominance in these well-paying, responsible positions. (See table 13.)

The 1974 new hires data also reveal that women still have difficulty finding jobs in utilities or transportation functions, since only 6 percent of the female new hires were employed by these districts. Hospitals and sanatoriums continue to be the chief employment source for women; 83 percent of their new jobs were obtained in these districts.

Table 13. Occupational Distribution of Full-Time New Hires in Special District Government, by Sex, 1974

Job Category	Men	Women

Note: Due to rounding, percentages may not add to 100.0.
Source: "State and Local Government Information" (EEO-4) reports, EEOC, 1974.

Special districts hired 13,100 blacks between 1973 and 1974 and half those hired were service/maintenance workers. Black men were especially affected by these hiring practices since 7 of every 10 were hired for such jobs. In contrast, only 4 of every 10 white men were hired as service/maintenance workers.

The ratio of whites to blacks among newly hired special district employees was 3 to 1. However, among administrators the ratio jumped to 10 to 1 and it was 9 to 1 among professionals. Only in clerical and para-professional jobs did the ratio of white to black new hires approach 3 to 1, and in service/maintenance it was nearly 1 to 1.

New hires among black men were spread among three functions--hospitals and sanatoriums (32 percent), housing (31 percent), and utilities and transportation (27 percent). However, in each of these functions, at least 60 percent of the black men were hired for service/maintenance jobs. Over 70 percent of the black women were hired by hospitals and sanatoriums, but four-fifths of the jobs filled by black women in this function were in service/maintenance, clerical or para-professional fields. Black women still had problems finding jobs in utilities and transportation. Only 416 of the nearly 6,700 black female new hires were employed by these districts, and over 70 percent worked in stereotypical clerical jobs.

New hires data for Spanish Surnamed Americans indicate that they continue to be employed in the least responsible positions in special districts. Nearly half (49 percent) were hired for service/maintenance jobs and over a fourth (28 percent) for either clerical or para-professional occupations. Only 1 percent of all newly hired Spanish Surnamed Americans worked as administrators and only 5 percent were hired as professionals. (See table 15.)

Hospitals and sanatoriums employed 47 percent of the newly hired Spanish Surnamed Americans, including 79 percent of all Spanish Surnamed American female new hires. Half the male new hires worked for utility or transportation districts, but three-fourths were hired into service/maintenance jobs. Housing districts employed only 12 percent of all newly hired Spanish Surnamed Americans but they employed 27 of the 31 newly hired Spanish Surnamed administrators.

Table 14. Functional Distribution of Full-Time New Hires in Special District Government by Sex and Race/Ethnic Group, 1974

Special districts hired 566 Asian Americans and nearly half were professionals. Asian women were the overwhelming majority (78 percent) of the newly hired Asian American professionals and hospitals and sanatoriums hired 95 percent of these workers. There were 187 newly hired American Indians and utilities/transportation employed 70 percent of them (see table 14). Newly hired Indian men were employed principally as blue-collar employees while women were principally clericals. Among Indian new hires in special districts only two were administrators and only seven were professionals.

OTHER THAN FULL-TIME EMPLOYMENT

Hospitals and sanatoriums provided over half the jobs (53 percent) in other than full-time employment (part-time and/or temporary). Utility or transportation districts, which employed 33 percent of all full-time employees, employed only 10 percent of the employees working other than full-time. (See table 16.)

Women held 59 percent of the part-time or temporary jobs, 15 percentage points higher than their full-time proportion. Minorities were only 18 percent of all part-time employees, 10 percentage points less than their full-time rate. Blacks felt the brunt of minorities'lower participation, evidenced by the 9 percentage points they lost in part-time employment.

Despite their majority among part-time employees, women were less than a majority (39 percent) of all part-time administrators. Furthermore, 80 percent of the women administrators were employed by hospitals and sanatoriums. These districts employed the overwhelming majority (74 percent) of women in part-time or temporary jobs, including 94 percent of the women professionals and 91 percent of the women technicians. Outside of hospitals and sanatoriums, women were employed principally as para-professionals, clericals or service/maintenance workers. Consequently, women's dependence on hospital and sanatorium districts for meaningful employment was as much a factor in part-time employment as in full-time work.

Blacks did not gain access to part-time or temporary jobs at a rate anywhere near their full-time participation. We can easily see the decline in employment opportunities for black workers by comparing white and black employment in both full- and part-time jobs. Among full-time jobs the

ratio of white to black workers was 3 to 1. In part-time or temporary employment, the ratio doubled to 6 to 1, with white women effecting most of the increase. White women held only three times as many full-time jobs as black women but more than eight times as many part-time jobs.

While black participation rates differed between full- and part-time jobs, blacks' employment in each lacked the quality of whites' employment. Black part-time employees (49 percent) worked principally as service/maintenance workers. (See table 17.) The proportion of whites in such jobs was 21 percentage points less than the black proportion. One of five white part-time workers was a professional or administrator, while only one of 20 blacks was employed part-time in either of these job categories.

Spanish Surnamed Americans were 3.4 percent of all other than full-time employees, a rate below their participation in full-time jobs. They were most often employed as service/maintenance workers (45 percent); less than 8 percent were either administrators or professionals. Fewer than 250 Asian Americans were employed on a part-time or temporary basis by special districts, but over a third (34 percent) were professionals. American Indians, virtually excluded from full-time employment, were almost nonexistent in part-time employment. Only 68 out 43,000 part-time special district workers were American Indians.

CONCLUSION

Two functions of government dominated employment in special districts. Nearly three-fourths (74 percent) of the employees worked either in hospitals and sanatoriums or utilities and transportation. In contrast, these functions employed less than a fourth (23 percent) of the employees in the aggregate State and local government work force.

The primary difference between employment in hospitals and sanatoriums and employment in utilities and transportation was the level of wages each function paid. The median salary for full-time utilities and transportation employees was $5,600 higher than the median salary for full-time hospitals and sanatorium employees. This gap was especially significant for women, since for every 100 employed in special districts 75 worked for hospitals and sanatoriums and only 9 for utilities and transportation.

Women's concentration in hospitals and sanatoriums was a major factor in both white and minority women earning lower salaries than their male counterparts. However, minority women faced further problems in accessing the better paying jobs in special districts. Even in hospitals and sanatoriums, where women comprised 52 percent of the administrators and 87 percent of the professionals, corresponding proportions for minority women only reached 3 and 11 percent, respectively. Faced with the same problem as white women in gaining access to jobs in utilities and transportation, but faced with the added problem of accessing the better paying jobs in hospitals and sanatoriums, over half (52 percent) of the minority women employed in special districts earned less than $6,000 a year, over $3,000 less than the median salary for full-time employees.

The utilities and transportation function was a much greater source of employment for minority men (45 percent). As a result their overall median annual salary exceeded that for minority women by an estimated $4,300. However, their employment indicates that they were utilized far too often in the function's least challenging positions. For example, 70 percent of the minority men but only 36 percent of the white men were employed in service/maintenance jobs. In contrast, only 5 percent of the minority men, but 16 percent of the white men, were employed as administrators or professionals in utilities and transportation.

Minorities and women were both well represented in special district employment. However, women were virtually dependent on hospitals and sanatoriums for employment while minorities, especially men, were over-concentrated in service/maintenance jobs. Women were virtually excluded from the high salary utilities or transportation district jobs and minorities were substantially underrepresented in the professional and decision-making positions in all functions.

Appendix 2: State and Local Government Information (EEO-4) Instructions for Filing and Report Forms

**EQUAL EMPLOYMENT
OPPORTUNITY COMMISSION**
WASHINGTON, D.C.

**State and Local Reporting Committee
1800 G Street, N.W.
Washington, D.C. 20506**

EEOC FORM 164, STATE AND LOCAL GOVERNMENT INFORMATION (EEO-4)
(RCS: OMB No. 124-R0009)

INSTRUCTION BOOKLET

Under Public Law 88-352, Title VII of the Civil Rights Act of 1964, as amended by the Equal Employment Opportunity Act of 1972, all States and local governments that have 15 or more employees are required to keep records and to make such reports to the Equal Employment Opportunity Commission as are specified in the regulations of the Commission. The applicable provisions of the law, Section 709(c) of Title VII, and the regulations issued by the Commission on May 14, 1973, are printed in full in the Appendix (4) to these instructions. School systems and educational institutions are covered by other employment surveys and are excluded from EEO-4.

In the interests of consistency, uniformity and economy, State and Local Government Report EEO-4 is being utilized by Federal government agencies that have responsibilities with respect to equal employment opportunity. A joint State and Local Reporting Committee with which this report must be filed represents these various Federal agencies. In addition, this report should bring about uniformity in State and local government recordkeeping and reporting and should serve as a valuable tool for use by the political jurisdictions in evaluating their own internal programs for insuring equal employment opportunity.

As stated above, the filing of Report EEO-4 is required by law; it *is not voluntary.* Under Section 709(c) of Title VII, the Attorney General of the United States may compel a jurisdiction to file this report by obtaining an order from a United States District Court.

1. WHO MUST FILE

Those who must file this report include (1) all States; (2) all other political jurisdictions which have 100 or more employees; and (3) an annual sample of those political jurisdictions which have 15-99 employees. The sample is rotated annually, so that none of the smaller jurisdictions will be required to file in consecutive years and all will be required to file in their turn. Sampled jurisdictions will be informed by receipt of the forms that they have been selected to report in a particular year.

2. WHO MUST KEEP RECORDS

Every political jurisdiction with 15 or more employees must make and keep records and statistics which would be necessary for the completion of Report EEO-4, as set forth in these instructions. Records must be kept for a period of 3 years. See regulations 1602.30 and 1602.31 in the Appendix (4).

Although the EEO-4 report requires the combining of agency data to complete the report, separate data for each agency must be maintained either by the agency itself or by the office responsible for preparing the EEO-4 report, and should be available upon request to representatives of Federal agencies.

3. HOW TO FILE

States should file a separate form for each function performed, maximum of 15 separate forms, for each Standard Metropolitan Statistical Area (SMSA), and a maximum of 15 forms for the rest of the State, covering all employees not employed in an SMSA. State reports should cover state employees only. Where SMSA's cross State lines, the state is responsible only for that state's employment in that SMSA.

Recipients below the State level (county, city, township, special district) should file one form for each function listed on page 1 of the form (if that function is performed), for a maximum of 15 forms. Jurisdictions should report only persons working for the jurisdiction.

Where interstate, intercounty, etc., boards, agencies, commissions, or other type special district governments exist, the forms should be submitted by the headquarters of the special district.

Blank forms will be sent to a central office for the political jurisdiction. In those jurisdictions where all data are available at a single location, forms may be completed by the central office. Where data are not available centrally, figures should be obtained by the central office from all agencies and aggregated into the proper forms by functions. [In both cases, a list of *all agencies covered* should accompany the forms.]

Enclosed with the forms is a summary page on which you are requested to check those functions for which you are submitting completed reports; functions for which you are not reporting; and functions for which you will be reporting at a later date. This will facilitate our own record-keeping, and minimize unnecessary follow-up correspondence.

The summary form also contains a provision where one official can certify as to the accuracy and completeness of the entire report from the jurisdiction. If such certification can be and is made by one official, a separate signature on every form will not be required.

The fact that a branch or agency of a government has separately elected officials, or is autonomous or semiautonomous in its operations does not affect the legal status of the jurisdictions, nor the requirement that EEO-4 cover the entire jurisdiction. To the extent feasible, the report should cover all branches of the government. In any cases where that is not feasible, and data are not available to the central office of the government, *a list of agencies and addresses not included should accompany the report.*

In all cases, the original and 1 copy of all completed forms must be returned in one package.

4. WHEN TO FILE

This annual report must be filed with the Equal Employment Opportunity Commission no later than September 30th. Employment Figures should cover the payroll period which includes June 30.

5. WHERE TO FILE

The completed reports (in duplicate) should be forwarded to the P.O. Box indicated on the EEO-4 form. All requests for additional report forms should also be directed to this address.

6. REQUESTS FOR INFORMATION AND SPECIAL PROCEDURES

An employer who claims that preparation or the filing of Report EEO-4 would create undue hardships may apply to the Commission for a special reporting procedure. In such cases, the employer should submit in writing an alternative proposal for compiling and reporting information to the EEO-4 Coordinator, Equal Employment Opportunity Commission, 1800 G Street, N.W., Washington, D.C. 20506.

Only those special procedures approved in writing by the Commission are authorized. Such authorizations remain in effect until notification of cancellation is given. All requests for information should be sent to the same address.

7. ELECTED AND APPOINTED OFFICIALS

Section 701(f) of the Equal Employment Opportunity Act of 1972 contains an exemption for elected and certain appointed officials that is set forth in definition of "employee" in Appendix 1. Based on the legislative history of Section 701(f), the General Counsel of the Commission has ruled that this exemption was intended by the Congress to be construed narrowly. This ruling concluded that only the following persons would be included in the exemption:

(1) State and local elected officials.

(2) Such official's immediate secretary, administrative, legislative, or other immediate or first-line aide.

(3) Such official's legal advisor.

(4) Appointed cabinet officials in the case of a Governor, or heads of executive departments in the case of a Mayor or County Council.

No other persons appointed by an elected official are exempt under this interpretation. In no case is any person exempt who is appointed by an appointed official, whether or not the latter is himself exempt. Furthermore, as specified in Section 701(f), the exemption does not include employees subject to the civil service laws of a State government, governmental agency or political subdivision.

8. CONFIDENTIALITY

All reports and information from individual reports are subject to the confidentiality provisions of Section 709(e) of Title VII, and may not be made public prior to the institution of any proceeding under Title VII. However, aggregate data may be made public in a manner so as not to reveal any particular jurisdiction's statistics.

INSTRUCTIONS ON HOW TO PREPARE INFORMATION REPORTS

Definitions of Terms and Categories are
Located in the Appendix

SECTION A—TYPE OF GOVERNMENT

Check one box indicating type of government.

SECTION B—IDENTIFICATION

Indicate the name and central mailing address of the governmental jurisdiction if different from address label in top margin.

SECTION C—FUNCTION

The forms are mailed in sets of 15, with a different function marked on each form in a set. Please use the appropriate form for each function for which you are reporting. The data should be aggregated for all agencies performing a particular function. This also applies to unspecified functions, which are to be combined on one report marked number 15, "Other." State education agencies, both agencies covering elementary and secondary schools and those covering higher education, should be included in Function 15.

If an agency's activities cover more than one of the form's specified functions, those activities should be separated and reported under separate functions, where it is feasible to do so. Where the political jurisdiction is unable to make such separation of data, the agency should be reported under the function that represents its dominant activity. For example, if a transportation department includes among other functions streets and highways and two-thirds of the employees of the department are engaged in street-and-highway activities, those employees should be separated out and reported separately if feasible. If not, the entire department should be reported in Function 2, Streets and Highways. *In no case, should more than one function be reported on a single form.*

To each report, attach a list giving the name and address of all agencies covered. If the data for any agency or branch of the government cannot be supplied by the central office of a jurisdiction, attach a list with the name and address of each agency not included.

SECTION D—EMPLOYMENT DATA AS OF JUNE 30

For purposes of this report, a person is an employee of a political jurisdiction if he is on the payroll of that jurisdiction, regardless of the source of the funds by which he is paid.

1. FULL-TIME EMPLOYEES

(For detailed explanation of job categories and race/ethnic identification, see Appendix.)

Employment data should include total full-time employment except those elected and appointed officials specified in section 7 above of these instructions. Where employees receive separate salaries or payments from two or more jurisdictions, but work full-time for one jurisdiction, they should be counted as full-time employees by that jurisdiction, and to the extent possible their annual salary should reflect their total earnings from all jurisdictions from which they are paid. Also, where a person is a full-time employee of a jurisdiction, but is employed in more than one function, he should be reported for the function which accounts for most of his work-time. Trainees should be counted in appropriate columns by job, salary, race, and sex.

a. **Race/Sex Data**—Columns A through L should reflect employment for the categories indicated. Every employee must be accounted for in *one and only one* of the categories. Definitions are included in the Appendix (2).

b. **Occupational Data**—Employment data should be reported by annual salary within job category. Report each employee in *only one* job/salary category. In order to simplify and standardize the method of reporting, all jobs are considered as belonging in one of the broad occupations shown in the table. To assist you in determining how to place your jobs within the occupational groups, a description of job categories with examples follows in the Appendix (3). The list of examples is in no way exhaustive. *Total Line – Report *total employment for this matrix*, as well as column totals.

c. **Annual Salary** – Where employees are paid on other than an annual basis, their regular earnings in the payroll period including June 30, except for overtime pay which is not regular and recurrent, but including all special increments that are part of their annual earnings, should be expanded and expressed in terms of an annual income.

2. OTHER THAN FULL-TIME EMPLOYEES

Employment data should include all employees not included in the full-time matrix, except those specifically exempted (see Section 7, Elected and Appointed Officials). Where employees are working part-time for different jurisdictions, and are on separate payrolls of different jurisdictions, they should be reported as part-time employees of the separate jurisdictions. Persons on the payroll of the jurisdiction for a specified temporary appointment, such as the public employment program, should be included in this category.

*Total Line – Report *total employment for this matrix*, as well as column totals.

3. NEW HIRES DURING FISCAL YEAR

Statistics on new hires during the past fiscal year are required to be reported beginning with the 1974 survey. New hires data should reflect all permanent full-time employees hired from July 1 to June 30.

*Total Line – Report *total employment for this matrix*, as well as column totals.

REMARKS

Include in this section any remarks, explanations, or other pertinent information regarding this report.

NOTE: List here the National Crime Information Center (NCIC) numbers assigned by the U.S. Department of Justice to any criminal justice agencies whose data are included.

CERTIFICATION

The report must be certified and signed by an official responsible for the information, unless this report has been included in those certified and signed for on the summary page accompanying and submitted with the completed forms.

APPENDIX

1. DEFINITIONS APPLICABLE TO ALL EMPLOYERS

a. "Commission" refers to the Equal Employment Opportunity Commission established under Title VII of the Civil Rights Act of 1964.

b. "Employee" means an individual employed by a political jurisdiction, who is on the payroll of that jurisdiction, regardless of the source of the funds by which he is paid. The following is an exception from the definition, subject to the interpretation in Section 7 above of these instructions: The term "employee" shall not include any person elected to public office in any State or political subdivision of any State by the qualified voters thereof, or any person chosen by such officer to be on such officer's personal staff, or an appointee on the policymaking level or an immediate adviser with respect to the exercise of the constitutional or legal powers of the office. The exception set forth in the preceding sentence shall *not* include employees subject to the civil service laws of a State government, governmental agency or political subdivision.

c. "Full-time Employees" – Persons employed during this pay period to work the number of hours per week that represent regular full-time employment (excluding temporaries and intermittents).

d. "Other than Full-time Employees" – Persons employed during this pay period on a part-time basis. Include those daily or hourly employees usually engaged for less than the regular full-time work week, temporaries working on a seasonal basis (whether part-time or full-time) or hired for the duration of a particular job or operation, including public employment programs, and intermittents.

e. "New Hires During Fiscal Year" – Persons both with and without previous experience and transfers who were hired for the first time in this jurisdiction or rehired after a break in service for permanent full-time employment.

2. RACE/ETHNIC IDENTIFICATION

An employer may acquire the race/ethnic information necessary for this section either by visual surveys of the work force, or from post-employment records as to the identity of employees. An employee may be included in the minority group to which he or she appears to belong, or is regarded in the community as belonging.

Since visual surveys are permitted, the fact that race/ethnic identifications are not present on agency records is not an excuse for failure to provide the data called for. However, although the Commission does not encourage direct inquiry as a method of determining racial or ethnic identity, this method is not prohibited in cases where it has been used in the past, or where other methods are not practical, provided it is not used for purposes of discrimination.

Moreover, the fact that employees may be located at different addresses does not provide an acceptable reason for failure to comply with the reporting requirements. In such cases, it is recommended that visual surveys be conducted for the employer by persons such as supervisors who are responsible for the work of the employees or to whom the employees report for instructions or otherwise.

Please note that the General Counsel of the Commission has ruled, on the basis of court decisions, that the Commission has the authority to require the racial and ethnic identification of employees, regardless of any possibly conflicting state or local laws.

The concept of race as used by the Equal Employment Opportunity Commission does *not* denote clearcut scientific definitions of anthropological origins. For the purposes of this report, an employee may be included in the group to which he or she appears to belong, identifies with, or is regarded in the community as belonging. However, no person should be counted in more than *one* race/ethnic category.

NOTE: The category "Spanish Surnamed", while not a race identification, is included as a separate ethnic category because of the employment discrimination often encountered by this group; for this reason do not include Spanish Surnamed under either "white" or "black".

For the purposes of this report, the following group categories will be used:

a. The category "White": include persons of Indo-European descent, including Pakistani and East Indian.

b. The category "Black": include persons of African descent as well as those identified as Jamacian, Trinidadian, and West Indian.

c. The category "Spanish Surnamed": include all persons of Mexican, Puerto Rican, Cuban, Latin American or Spanish descent.

d. The category "American Indian": include persons who identify themselves or are known as such by virtue of tribal association.

e. The category "Asian American": include persons of Japanese, Chinese, Korean or Filipino descent.

f. The category "Other": include Aleuts, Eskimos, Malayans, Thais and others not covered by the specific categories on the form.

3. DESCRIPTION OF JOB CATEGORIES

a. **Officials and Administrators:** Occupations in which employees set broad policies, exercise overall responsibility for execution of these policies, or direct individual departments or special phases of the agency's operations, or provide specialized consultation on a regional, district or area basis. Includes: department heads, bureau chiefs, division chiefs, directors, deputy directors, controllers, examiners, wardens, superintendents, sheriffs, police and fire chiefs and inspectors and kindred workers.

b. **Professionals:** Occupations which require specialized and theoretical knowledge which is usually acquired through college training or through work experience and other training which provides comparable knowledge. Includes: personnel and labor relations workers, social workers, doctors, psychologists, registered nurses, economists, dieticians, lawyers, system analysts, accountants, engineers, employment and vocational rehabilitation counselors, teachers or instructors, police and fire captains and lieutenants and kindred workers.

c. **Technicians:** Occupations which require a combination of basic scientific or technical knowledge and manual skill which can be obtained through specialized post-secondary school education or through equivalent on-the-job training. Includes: computer programmers and operators, draftsmen, surveyors, licensed practical nurses, photographers, radio operators, technical illustrators, highway technicians, technicians (medical, dental, electronic, physical sciences), assessors, inspectors, police and fire sergeants and kindred workers.

d. **Protective Service Workers:** Occupations in which workers are entrusted with public safety, security and protection from destructive forces. Includes: police patrol officers, fire fighters, guards, deputy sheriffs, bailiffs, correctional officers, detectives, marshals, harbor patrol officers and kindred workers.

e. **Paraprofessionals:** Occupations in which workers perform some of the duties of a professional or technician in a supportive role, which usually require less formal training and/or experience normally required for professional or technical status. Such positions may fall within an identified pattern of staff development and promotion under a "New Careers" concept. Includes: library assistants, research assistants, medical aides, child support workers, police auxiliary, welfare service aides, recreation assistants, homemakers aides, home health aides, and kindred workers.

f. **Office and Clerical:** Occupations in which workers are responsible for internal and external communication, recording and retrieval of data and/or information and other paperwork required in an office. Includes: bookkeepers, messengers, office machine operators, clerk-typists, stenographers, court transcribers, hearing reporters, statistical clerks, dispatchers, license distributors, payroll clerks and kindred workers.

g. **Skilled Craft Workers:** Occupations in which workers perform jobs which require special manual skill and a thorough and comprehensive knowledge of the processes involved in the work which is acquired through on-the-job training and experience or through apprenticeship or other formal training programs. Includes: mechanics and repairmen, electricians, heavy equipment operators, stationary engineers, skilled machining occupations, carpenters, compositors and typesetters and kindred workers.

h. **Service–Maintenance:** Occupations in which workers perform duties which result in or contribute to the comfort, convenience, hygiene or safety of the general public or which contribute to the upkeep and care of buildings, facilities or grounds of public property. Workers in this group may operate machinery. Includes: chauffeurs, laundry and dry cleaning operatives, truck drivers, bus drivers, garage laborers, custodial personnel, gardeners and groundkeepers, refuse collectors, construction laborers.

4. LEGAL BASIS FOR REQUIREMENTS

Section 709(c), Title VII, Civil Rights Act of 1964

(As Amended by the Equal Employment Opportunity Act of 1972)

Recordkeeping; reports

Every employer, employment agency, and labor organization subject to this title shall (1) make and keep such records relevant to the determinations of whether unlawful employment practices have been or are being committed, (2) preserve such records for such periods, and (3) make such reports therefrom as the Commission shall prescribe by regulation or order, after public hearing, as reasonable, necessary, or appropriate for the enforcement of this title or the regulations or orders thereunder. The Commission shall, by regulation, require each employer, labor organization, and joint labor-management committee subject to this title which controls an apprenticeship or other training program to maintain such records as are reasonably necessary to carry out the purposes of this title, including, but not limited to, a list of applicants who wish to participate in such program, including the chronological order in which applications were received, and to furnish to the Commission upon request, a detailed description of the manner in which persons are selected to participate in the apprenticeship or other training program. Any employer, employment agency, labor organization, or joint labor-management committee which believes that the application to it of any regulation or order issued under this section would result in undue hardship may apply to the Commission for an exemption from the application of such regulation or order, and, if such application for an exemption is denied, bring a civil action in the United States district court for the district where such records are kept. If the Commission or the court, as the case may be, finds that the application of the regulation or order to the employer, employment agency, or labor organization in question would impose an undue hardship, the Commission or the court, as the case may be, may grant appropriate relief. If any person required to comply with the provisions of this subsection fails or refuses to do so, the United States district court for the district in which such person is found, resides, or transacts business, shall, upon application of the Commission, or the Attorney General in a case involving a government, governmental agency or political subdivision, have jurisdiction to issue to such person an order requiring him to comply.

Title 29, Chapter XIV, Code of Federal Regulations

Subpart I—State and Local Governments Recordkeeping

§1602.30 Records to be made or kept.

On or before July 30, 1973, and annually thereafter, every political jurisdiction with 15 or more employees is required to make or keep records and the information therefrom which are or would be necessary for the completion of report EEO-4 under the circumstances set forth in the instructions thereto, whether or not the political jurisdiction is required to file such report under § 1602.32 of the regulations in this part. The instructions are specifically incorporated herein by reference and have the same force and effect as other sections of this part.[1] Such records and the information therefrom shall be retained at all times for a period of 3 years at the central office of the political jurisdiction and shall be made available if requested by an officer, agent, or employee of the Commission under Section 710 of Title VII, as amended. Although agency data are aggregated by functions for purposes of reporting, separate data for each agency must be maintained either by the agency itself or by the office of the political jurisdiction responsible for preparing the EEO-4 form. It is the responsibility of every political jurisdiction to obtain from the Commission or its delegate necessary instructions in order to comply with the requirements of this section.

§1602.31 Preservation of records made or kept.

(a) Any personnel or employment record made or kept by a political jurisdiction (including but not necessarily limited to application forms submitted by applicants and other records having to do with hiring, promotion, demotion, transfer, layoff or termination, rates of pay or other terms of compensation, and selection for training or apprenticeship) shall be preserved by the political jurisdiction for a period of 2 years from the date of the making of the record or the personnel action involved, whichever occurs later. In the case of involuntary termination of an employee, the personnel records of the individual terminated shall be kept for a period of 2 years from the date of termination. Where a charge of discrimination has been filed, or an action brought by the Attorney General against a political jurisdiction under title VII, the respondent political jurisdiction shall preserve all personnel records relevant to the charge or action until final disposition of the charge or the action. The term "personnel record relevant to the charge," for example, would include personnel or employment records relating to the person claiming to be aggrieved and to all other employees holding positions similar to that held or sought by the person claiming to be aggrieved; and application forms or test papers completed by an unsuccessful applicant and by all other candidates for the same position as that for which the person claiming to be aggrieved applied and was rejected. The date of final disposition of the charge or the action means the date of expiration of the statutory period within which a person claiming to be aggrieved may bring an action in a U.S. district court or, where an action is brought against a political jurisdiction either by a person claiming to be aggrieved or by the Attorney General, the date on which such litigation is terminated.

(b) The requirements of this section shall not apply to application forms and other preemployment records of applicants for positions known to applicants to be of a temporary or seasonal nature.

Subpart J—State and Local Government Information Report

§1602.32 Requirement for filing and preserving copy of report.

(a) On or before July 30, 1974 and annually thereafter, certain political jurisdictions subject to title VII of the Civil Rights Act of 1964, as amended, shall file with the Commission or its delegate executed copies of "State and Local Government Information Report EEO-4" in conformity with the directions set forth in the form and accompanying instructions. The political jurisdictions covered by this regulation are (1) those which have 100 or more employees, and (2) those other political jurisdictions which have 15 or more employees from whom the Commission requests the filing of reports. Every such political jurisdiction shall retain at all times a copy of the most recently filed EEO-4 at the central office of the political jurisdiction for a period of 3 years and shall make the same available if requested by an officer, agent, or employee of the Commission under the authority of Section 710 of Title VII, as amended.

---

[1] NOTE.—Instructions were published as an appendix to the proposed regulations on Mar. 2, 1973 (38 FR 5662).

(b) For calendar year 1973, the requirements of paragraph (a) of this section shall be carried out on or before October 31, 1973.

§ 1602.33 Penalty for making of willfully false statements on report.

The making of willfully false statements on report EEO-4, is a violation of the United States Code, Title 18, Section 1001, and is punishable by fine or imprisonment as set forth therein.

§ 1602.34 Commission's remedy for political jurisdiction's failure to file report.

Any political jurisdiction failing or refusing to file report EEO-4 when required to do so may be compelled to file by order of a U.S. district court, upon application of the Attorney General.

§ 1602.35 Political jurisdiction's exemption from reporting requirements.

If it is claimed the preparation or filing of the report would create undue hardship, the political jurisdiction may apply to the Commission for an exemption from the requirements set forth in this part by submitting to the Commission or its delegate a specific proposal for an alternative reporting system prior to the date on which the report is due.

§ 1602.36 Schools exemption.

The recordkeeping and report-filing requirements of subparts I and J shall not apply to State or local educational institutions or to school districts or school systems or any other educational functions. The previous sentence of this section shall not act to bar jurisdiction which otherwise would attach under § 1602.30.

§ 1602.37 Additional reporting requirements.

The Commission reserves the right to require reports, other than that designated as the "State and Local Government Information Report EEO-4," about the employment practices of individual political jurisdictions or group of political jurisdictions whenever, in its judgment, special or supplemental reports are necessary to accomplish the purposes of Title VII. Any system for the requirement of such reports will be established in accordance with the procedures referred to in section 709(c) of Title VII and as otherwise prescribed by law.

Subpart K—Records and Inquiries as to Race, Color, National Origin, or Sex

§ 1602.38 Applicability of State or local law.

The requirements imposed by the Equal Employment Opportunity Commission in these regulations, subparts I and J, supersede any provisions of State or local law which may conflict with them.

FORM
APPROVED
OMB NO.
124-R0009

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION
STATE AND LOCAL GOVERNMENT INFORMATION (EEO-4)

EXCLUDE SCHOOL SYSTEMS AND EDUCATIONAL INSTITUTIONS
(Read attached instructions prior to completing this form)

MAIL COMPLETED
FORM TO:

A. TYPE OF GOVERNMENT (Check one box only)

☐ 1. State ☐ 2. County ☐ 3. City ☐ 4. Township ☐ 5. Special district

☐ 6. Other (Specify)____________________

B. IDENTIFICATION

1. NAME OF POLITICAL JURISDICTION (If same as label, skip to Item C)				EEOC USE ONLY A
2. Address - Number and Street	CITY/TOWN	COUNTY	STATE/ZIP	B

C. FUNCTION

(Check one box to indicate the function for which this form is being submitted. Data should be reported for all departments and agencies in your government covered by the function indicated. If you cannot supply the data for every agency within the function, please attach a list showing name and address of agencies whose data are not included.)

1. FINANCIAL ADMINISTRATION. Tax assessing, tax billing and collection, budgeting, purchasing, central accounting and similar financial administration carried on by a treasurer's, auditor's or comptroller's office and

GENERAL CONTROL. Duties usually performed by boards of supervisors or commissioners, central administrative offices and agencies, central personnel or planning agencies, all judicial offices and employees (judges, magistrates, bailiffs, etc.)

2. STREETS AND HIGHWAYS. Maintenance, repair, construction and administration of streets, alleys, sidewalks, roads, highways and bridges.

3. PUBLIC WELFARE. Maintenance of homes and other institutions for the needy; administration of public assistance. (Hospitals and sanitoriums should be reported as item 7.)

4. POLICE PROTECTION. Duties of a police department, sheriff's, constable's, coroner's office, etc., including technical and clerical employees engaged in police activities.

5. FIRE PROTECTION. Duties of the uniformed fire force and clerical employees. (Report any forest fire protection activities as item 6.)

6. NATURAL RESOURCES. Agriculture, forestry, forest fire protection, irrigation drainage, flood control, etc., and
PARKS AND RECREATION. Provision, maintenance and operation of parks, playgrounds, swimming pools, auditoriums, museums, marinas, zoo, etc.

7. HOSPITALS AND SANITORIUMS. Operation and maintenance of institutions for inpatient medical care.

8. HEALTH. Provision of public health services, out-patient clinics, visiting nurses, food and sanitary inspections, mental health, etc.

9. HOUSING. Code enforcement, low rent public housing, fair housing ordinance enforcement, housing for elderly, housing rehabilitation, rent control.

10. COMMUNITY DEVELOPMENT. Planning, zoning, land development, open space, beautification, preservation.

11. CORRECTIONS. - Jails, reformatories, detention homes, half-way houses, prisons, parole and probation activities.

12. UTILITIES AND TRANSPORTATION. Includes water supply, electric power, transit, gas, airports, water transportation and terminals.

13. SANITATION AND SEWAGE. Street cleaning, garbage and refuse collection and disposal. Provision, maintenance and operation of sanitary and storm sewer systems and sewage disposal plants.

Appendix 3: Source and Reliability of Data

SPECIAL DISTRICTS

SOURCE AND RELIABILITY OF DATA

For this report employment information was obtained from special districts employing 15 or more non-elected and non-appointed full-time employees. In selecting the sample, all local governments were stratified by type and employment size. All jurisdictions with more than 100 full-time employees were included and a systematic random sample was taken of those local governments which have employment between 15 and 99. Forms were mailed to 595 independent jurisdictions. The overall response rate was 98 percent.

The statistics in this report which are based entirely or partially on sample data are subject to sampling variation which may cause them to vary somewhat from the result that would have been obtained had all jurisdictions been asked to submit their employment data.

The estimates presented include adjustments for non-response and are based upon the summation of the certainty units and the weighted sample units. Sampling error calculations indicate that the chances are 95 out of 100 that the figure which would be obtained from a complete enumeration is within 1 percent (plus or minus) of the EEO-4 estimate of total full-time employment. The complete count, without any sample error, would fall at some point in this range.

Estimates of subtotals, such as by individual functions, are subject to relatively larger variation, and range from 2 percent for "Hospitals and Sanatoriums" to 16 percent for "Community Development."

The tables in this report present estimates of median salaries. The sampling variability of an estimated median depends upon the relevant salary distribution as well as the size of the base. The smaller the base the larger the variability of a median.

Table 1 contains 95 percent confidence intervals for median salaries of various magnitudes and bases. It is intended to give some general indication of the relative size of the sampling variability of the medians.

A 95 percent confidence interval is defined such that if many samples of the same size were taken and a two standard error confidence interval were formed for each sample median, about 95 out of 100 of the intervals would contain the median which would result from a complete enumeration.

If in comparing two medians their confidence intervals overlap the assumption is that a complete enumeration could well show them to be of the same magnitude.

Table 1. Sampling Variability of Selected Medians

Characteristics	Median Salary	Base	95 Percent Confidence Interval
Total	$ 9,261	232,454	$ 9,125 - $ 9,375
White	9,822	166,575	9,623 - 9,906
Minority	7,779	65,879	7,600 - 7,979
Black	7,702	52,605	7,600 - 7,979
SSA	7,415	10,432	7,181 - 8,057
Asian	11,142	1,986	10,064 - 12,293
Indian	9,328	530	7,600 - 11,067
Other	9,237	326	7,467 - 10,933
Male	11,396	131,146	11,236 - 11,491
White	11,872	94,671	11,764 - 12,054
Black	10,181	28,446	9,982 - 10,436
SSA	8,917	6,505	8,300 - 9,478
Asian	13,410	1,035	11,955 - 14,819
Indian	11,011	322	8,324 - 13,745
Other	10,773	167	7,805 - 13,774
Female	6,715	101,308	6,569 - 6,815
White	7,092	71,904	7,169 - 7,446
Black	5,838	24,159	5,722 - 5,951
